*(Comparative and Transnational Perspectives on Research and its Application in the Field of Regional and Local Labour Market Monitoring, vol. 16)*

Technological change, multiple crises, green and digital transitions, and demographic shifts are transforming labour markets across European regions. Since the early 2000s, regional labour market foresight has gained importance in research, policy, and among actors such as chambers, employer organisations, and trade unions. Initiated in 2005, the EN RLMM has become a hub for exchanging innovative approaches to monitoring and forecasting regional labour markets. This volume presents methods, data, and knowledge transfer practices that enable anticipation of regional trends. Contributions from 31 experts highlight how tailored foresight approaches can support evidence-based policy planning in increasingly complex and dynamic labour market environments.

In Englisch

Technologischer Wandel, gesellschaftliche Krisen, grüne und digitale Transformationen sowie demografische Verschiebungen verändern die Arbeitsmärkte in vielen Regionen Europas und darüber hinaus grundlegend. Eine vorausschauende Analyse dieser Entwicklungen ist entscheidend für eine wirksame regionale Arbeitsmarktpolitik. Der Band versammelt Methoden, Daten und Praktiken des Wissenstransfers zur Prognose regionaler Arbeitsmarkttrends. 31 Expert:innen aus dem EN RLMM-Netzwerk zeigen Ansätze zur Stärkung regionaler Foresight-Kompetenz und evidenzbasierter Planung in zunehmend komplexen Arbeitssystemen.
